

FLOIXEM® CB

Descaler for boiler bodies
and exchangers

Condensation boilers, cleaning of the
of the exchanger on the smoke side.

Description and applications:

Descaling cleaner for boilers, it can be applied both in the combustion body and in the exchanger on the flue gas side. Its almost neutral working pH makes it suitable for all types of materials, not affecting aluminum or its alloys during the cleaning process.

Synergistic combination of dispersants, complexing agents and surfactants to achieve the best performance.

Product characteristics:

Appearance	Transparent liquid
Color	Blue
pH a 20°C	5,0 – 6,0
Flash point	Non-flammable

The data provided are based on our own measurements and specific literature. They do not constitute part of the technical specifications.

Properties:

- Removes organic deposits, mud and rust from the combustion chamber.
- Eliminates incrustation deposited by condensation water on the exchanger.
- Non corrosive.
- No transport or storage restrictions.

Instructions for use in combustion bodies:

Apply on the surfaces to be cleaned with the help of a spray head until all the incrustation is well soaked. Leave to act for 15-60 minutes depending on the amount of residue and then clean with abundant water, if possible, under pressure.

In case of persistent residues, the operation can be repeated.

Verify that the condensation liquid outlet has not been blocked by the removed material.

Instructions for use of the smoke side exchanger:

Spray on the incrustations until they are well wetted. Leave to act between 20 and 30 minutes depending on the amount of residue. If necessary, the solid can be brushed

before rinsing to help the product to act. Rinse with mains water or pressurized water to remove the solid, if necessary the process can be repeated.

Verify that the condensation liquid outlet has not been blocked by the removed material.

Precautions:

Since it is a non-flammable and non-corrosive product, it does not require any special precautions in its handling.

Avoid contact with eyes. In case of splashes, wash with plenty of water. Do not ingest or leave within reach of children, both the product and its mixtures with water. Store in a cool and ventilated place, avoiding strong heat.
